

About Avigilon

Avigilon designs and manufactures high-definition surveillance solutions that deliver the best image quality. Our megapixel cameras and award-winning Avigilon Control Center (ACC) software with High-Definition Stream Management™ (HDSM) technology deliver the best image detail in the industry, leading to faster response times, reduced investigation times, and superior overall protection.

USP's

- + Avigilon offers a full end-to-end security solution, inclusive of high-definition video surveillance, IT-friendly access control and powerful adaptive analytics technology.
- + High Definition Video Surveillance
- + Broadest range of megapixel cameras in the industry (from 1 MP to 29 MP)
- + Avigilon delivers superior image detail and maximum bandwidth efficiency, thanks to patented High Definition Stream Management Technology (HDSM)
- + Avigilon Control Center – Intuitive and easy to use video management software
- + Avigilon's technology is designed from a scratch for HD cameras and video streaming
- + The easiest transition from analogue to IP video, using the Avigilon video encoder
- + Complete end-to-end solution: cameras, NVR's and software work seamlessly together
- + Scalable and open solution – ONVIF Profile S compliant
- + Reduced installation time thanks to ease of installation
- + Megapixel cameras enable users to cover larger areas with fewer cameras, resulting in reduced installation and maintenance costs
- + No ongoing maintenance costs or annual license fees, delivering a lower total cost of ownership.
- + All equipment covered by Avigilon's 3 year advance replacement policy
- + Free of charge training either in person or via the online Avigilon University

Features & Benefits

- + High-quality megapixel cameras allow excellent image detail and recognition at lower cost
- + Easy to use software gives your employees efficient tools to search through hours of footage in seconds to reduce response times
- + Intelligent bandwidth management software HDSM™ does not overwhelm your network even with significant amount of cameras installed
- + Robust Avigilon solution allows hybrid systems with analogue and IP cameras all effortlessly working together via one VMS Avigilon Control Center
- + Avigilon's cameras will automatically upgrade to the latest version of firmware, when the installation is undertaken, providing the latest version of ACC is used

Providing ROI

- + Fastest search allows a user to browse hours of HD footage and find necessary evidence within seconds
- + Easy to use software does not require additional training for employees to get up to speed
- + Ease of installation and set-up allows to reduce installation effort and time spent on-site configuring cameras
